

I'm creating a full-page, illustrated PDF version of the Tailwind CSS 4.0 reference we drafted. It will include:

- Code snippets for buttons, cards, hero sections, grids, and navbars
- Rendered visual examples/mockups
- Beginner-friendly explanations of each utility group
- Responsive and hover/focus state examples

This PDF will be a professional, full-page reference handbook for Tailwind 4.0. Once generated, you can download it directly.
